Bob, thanks. This is helpful.

I would like to get a schedule of these planned interactive Envision sessions (one's coming up at the OWD I read) and the planned sessions with the Calapooia watershed Council and others. Reason is that I'd like to extend invitations, as appropriate, to congressional staffers.

Tom,

With regard to Envision, John has done a quite a lot of stakeholder outreach within the Willamette, particularly on water issues. I think these outreach activities have so far mostly involved stakeholder input/information gathering, with the interactive Envision sessions (such as with the Skagit stakeholder groups) yet to come. I'm cc'ing John here so that he can correct or elaborate.

With regard to the stand-alone modeling applications (e.g., Nathan's HexSim spotted owl work, and my VELMA ecohydrology work) we continue to actively interact with various decision makers, including in the arenas of management and policy of forest lands (wildlife, water, carbon, etc.) and agricultural lands (biofuels, water, nutrients, pesticides, etc.). This type of activity will ramp up in coming months, particularly in the ag arena (e.g., Calapooia watershed Council among others), as we move toward closing out WESP. Still much to catch up on, now that the planning has subsided!

Bob
